

The evidence of installation of require software and NAT network and ip addressing in give bellow

Phase 1

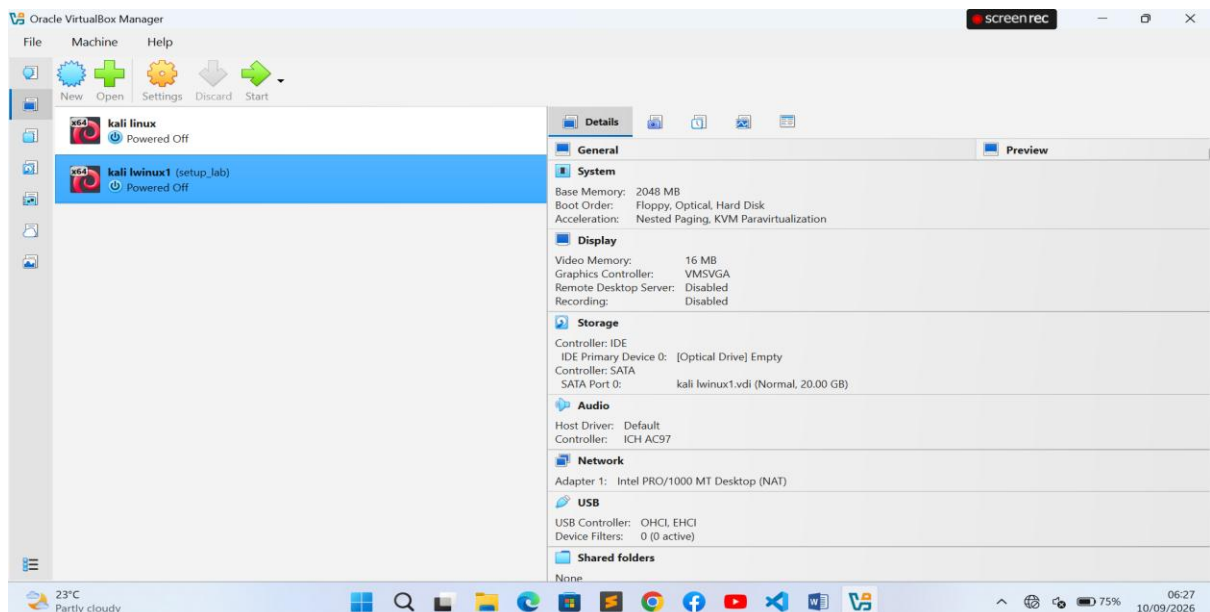

Step 1

Installing 7zip, I have install winrar prove of installation

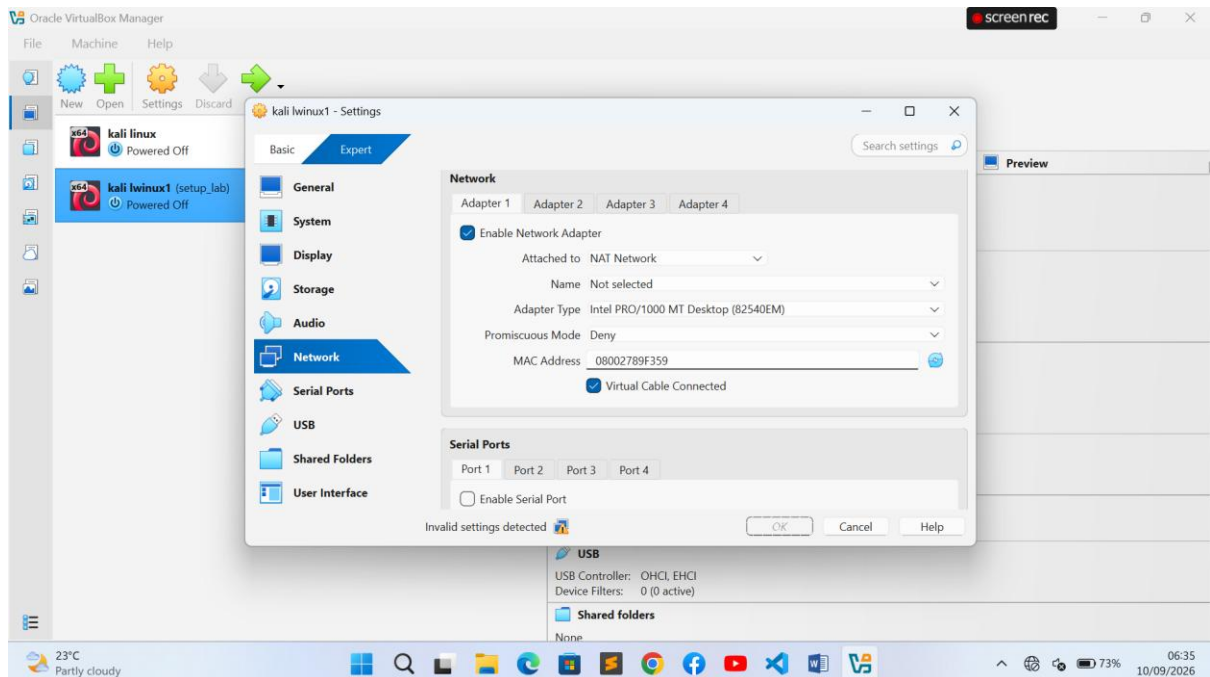

Step 2

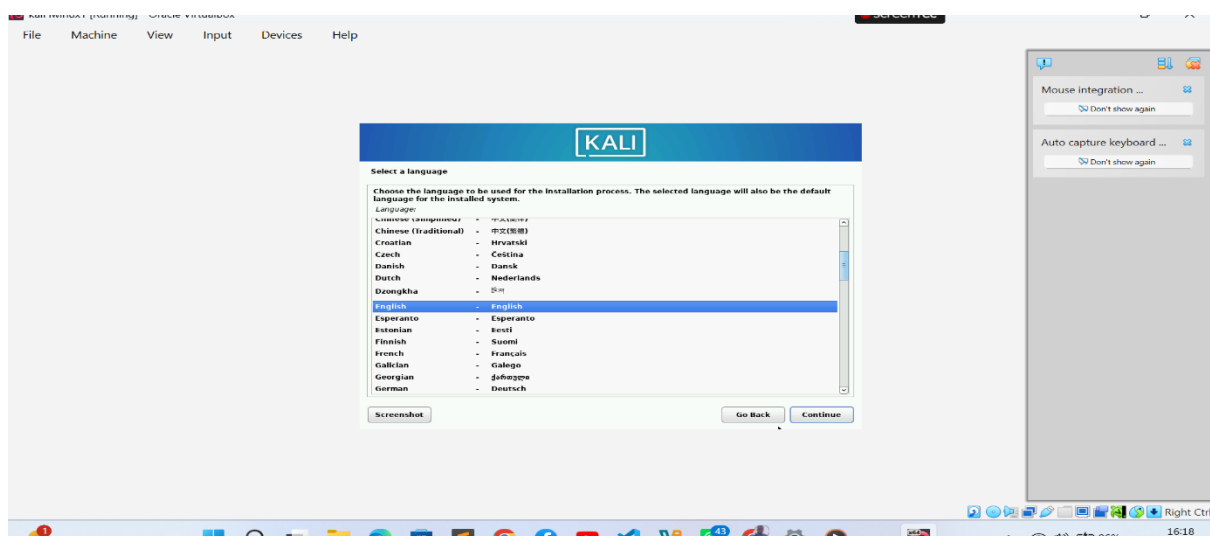

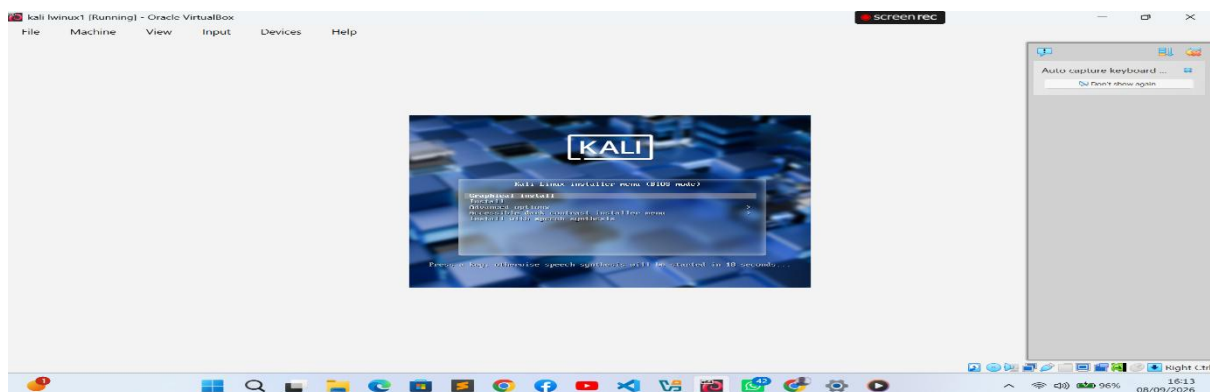

Downloading and installing virtualbox on my pc

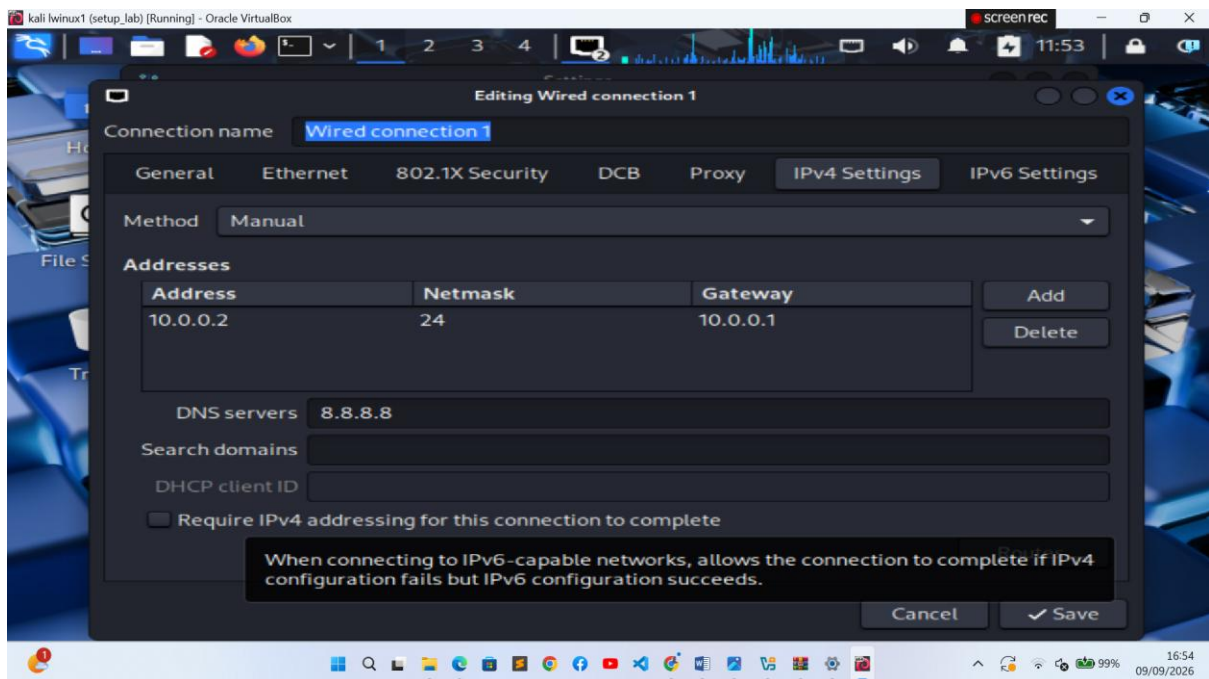

Step 3: configure the network setting on my virtualbox (create NATNETWORK 10.0.0.0/24)

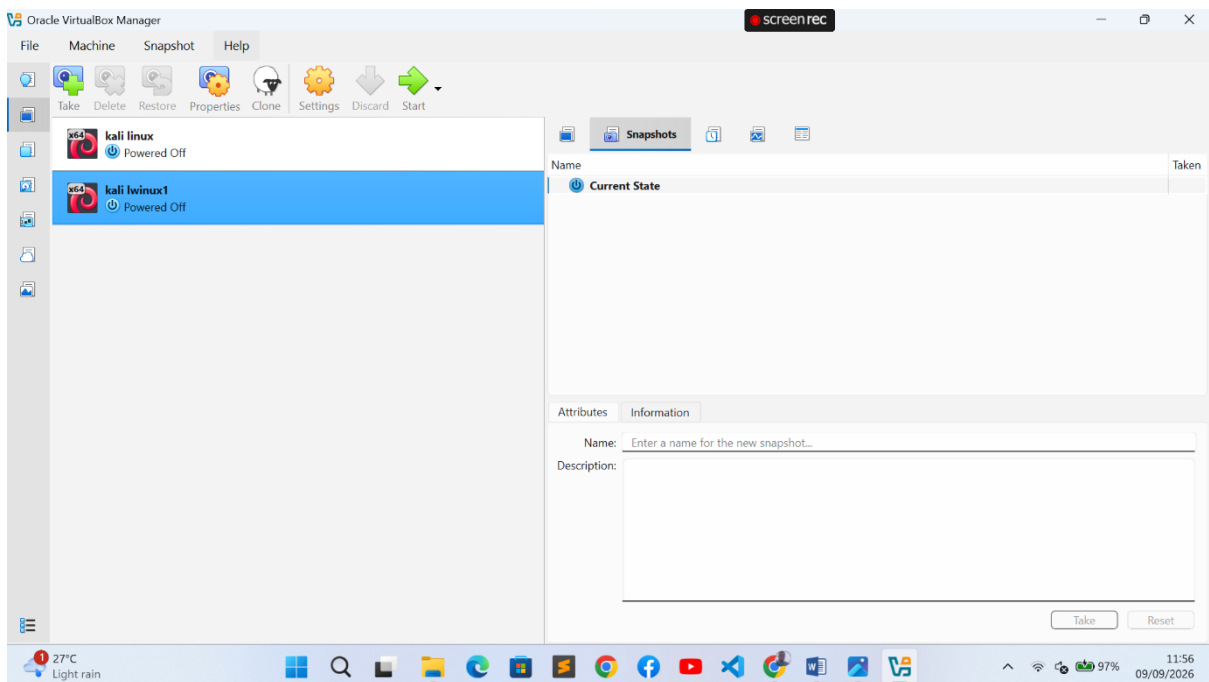

Step 4: downloading and import kali linux machine in my virtualbox.

Step 5: my kali linux ip configuration

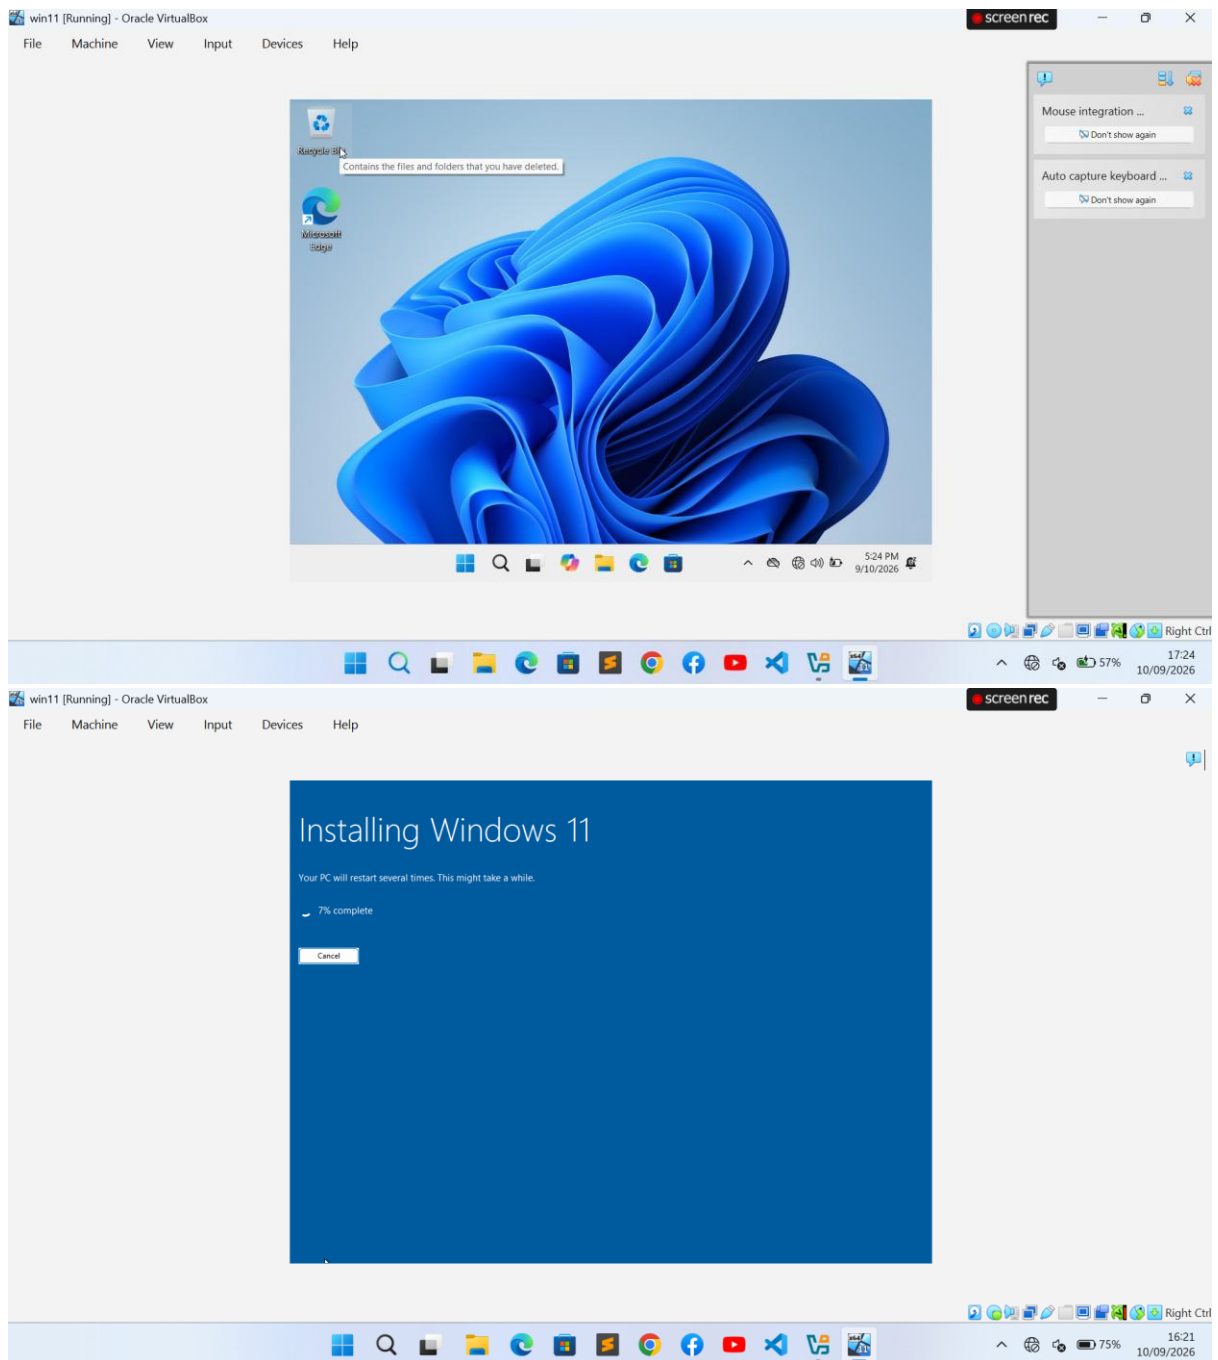

Step 6: a snapshot from my kali VM

Phase 2

On process

I only encounter manual configuration of this but I will try and resolve the problem,
